CaseWorx

Description
Designed specifically for the needs of the IAO professional advancement program, Caseworx-IAO streamlines the case presentation creation process by taking in small pieces of data from a patient's treatment case and organizing it into the approved IBO format. The candidate can concentrate on the quality of data and not the composition of the final presentation.
Caseworx emphasizes the anonymity of the presenter and case subject to ensure examiners' fair and balanced case evaluation. Electronic upload allows worldwide access to the system reducing time and effort in presenting case output. The Cases Server randomized examiner assignment for impartial scoring of cases.
Cases can be checked on at any time by the candidate just by starting the program. As examiners fulfill scoring, candidates can see scores and progress directly in Caseworx.

Features
Generates official IBO format case presentations (IBO 2017 Handbook)

- Divided data fields allow the user to enter individual pieces of data
- All data, imaging, and photo grids are automatically formatted into presentation output
- Imaging storage and organization for direct entry into the presentation
- Intra and extra oral photographs organized into the grid for presentation
- Images and photographs can be cropped or tweaked non-destructively without a third-party image editor
- Non-destructive editor preserves the authenticity of the image while allowing optimal presentation
- Electronic case upload for availability to upload orthodontic cases anytime, anywhere
- Electronic scoring system for consistent and prompt orthodontic cases scoring
- Automated case assignment process to ensure fair and impartial scoring
- Output is fully editable by the candidate before submission
- Output exportable to Microsoft Word for formatting and printing

Members of the IAO working towards their professional advancement can take advantage of JKL's Caseworx case presentation system to build cases quickly, efficiently, and with better accuracy. Electronic case submission for worldwide access to impartial case scoring.
